

Breathe Easier

WITH HEALTHY AIR ZONES

Businesses are helping Winchester-Frederick County breathe a little easier

Valley AIRNow cordially invites you to join our growing Healthy Air Zone network. Your business has been chosen to receive a free idle reduction street sign to encourage visitors and patrons to turn off their engines while parked. Motor vehicle exhaust contributes to ground-level ozone and increases the risk of cancer, heart and lung disease, asthma and allergies—particularly in sensitive groups such as children and the elderly.

"Part of our responsibility is reaching beyond our fence line and processes to educate contractors, truck drivers, and other non-employees. The signage is a constant reminder to inform all visitors to turn off their engines to help reduce emissions."

Kevin Burkett, O'Sullivan Films

Make your business a Healthy Air Zone partner. Your employees, your patrons, and your community will thank you! Remember:

HEALTHY PEOPLE
HEALTHY PLACES
+ HEALTHY PLANET

= HEALTHY AIR
